

VANWALL

Vandervell S

A TRUE ELECTRIC - AND EXCLUSIVE - SPORTING CAR IN A LIMITED SERIES

The Vandervell S is a four door hatchback plus tailgate and its aggressive shapes immediately attracts attention, characterized by aerodynamic details. The extremely sporty look is underlined by the large carbon fibre front aerodynamic splitter, side skirts and rear spoiler, which highlights the car's feisty personality.

From a styling design point of view, the front of the car has very bold and geometric lines, with an aggressive fender shape that incorporates the large cooling system air intake.

The bonnet profile has two side cuts that culminate in the side fenders, which wrap around the 21" alloy wheels (optional 22") and low profile tires.

The very slender dynamic profile sides are underlined by a wide lateral body groove that continues into the two doors.

The rear of the car has another sporty detail with an integrated deflector above the rear window.

The car's interior is characterized by its cockpit with special attention given to driving position, outstanding ergonomics and references to the world of motorsport. All this is achieved without sacrificing comfort by the use of the highest quality materials, such as fine leather and exposed carbon fibre.

Light weight is another key element in achieving exceptional performance. It is immediately clear that this model is the result of the extensive technical know-how and expertise accumulated over years by our dedicated team.

The new Vanwall is available in two versions with different technical specifications:

- Vandervell S, 4wd, 325 HP
- Vandervell S Plus, 4wd, 650 HP

"Vanwall's goal is to create unique, new generation cars, high quality and great performance, bringing them to the maximum possible development, able to convey the strong passion that animates the Vanwall Company".

Dr Colin Kolles
